

# History of the Kingdom of Eldoria

## Founding Era

The Kingdom of Eldoria was founded in the year 1024 by King Arcturus I, a visionary leader who united scattered tribes into one nation. The early settlers were farmers and hunters who believed in the guiding light of the Sword of Dawn, a mythical weapon said to have been crafted by celestial beings from fallen stars. For centuries, the people of Eldoria built vast cities of marble and stone, surrounded by fertile plains and shimmering rivers. Trade flourished, and early diplomacy established the kingdom as a beacon of civilization. Mythology tells of magical creatures that lived alongside humans during this era, contributing to the kingdom's strength and protection. The founding era is remembered as a time of great unity and promise, setting the stage for the kingdom's future prosperity.

## Golden Age

The Golden Age of Eldoria began in the 12th century, marked by an explosion of knowledge, art, and arcane discovery. Towering libraries were filled with manuscripts on alchemy, astronomy, and medicine. The magical universities of Auroria attracted scholars from distant lands, who came to study alongside dragonkeepers and shared their ancient knowledge in exchange for peace treaties. Music filled the streets, literature inspired revolutions of thought, and trade routes extended across continents. Eldoria's armies, clad in shining armor and supported by elemental mages, defended the realm from external threats. For nearly two centuries, Eldoria stood unrivaled in power, culture, and spiritual influence, remembered as the greatest era in its long history.

## Fall of the Kingdom

The decline of Eldoria began in the 14th century, as internal strife tore the once-united kingdom apart. Rival noble houses vied for power, sparking decades of civil war that drained the nation's strength. The rise of the Great Shadow War further destabilized the realm, as creatures of darkness invaded the borders. Dragons, once steadfast allies, withdrew to their mountain strongholds, refusing to be part of human conflict. By 1453, the capital city was sacked, its great cathedrals reduced to ruins. Survivors tell of the night sky blackening as the enemy swept through the land, ending Eldoria's thousand-year reign. What was a fragmented land of scattered villages, living in the shadow of a glorious past that would never return.
